

Personalized Therapy AI UI Blueprint

Goal

Build a **role-based interface** where:

- **Admin** controls access (manages therapists only).
- **Therapists** manage their assigned children/clients, view milestones/strategies, and chat with AI for personalized support.

USER ROLES & ACCESS

Role	Abilities	Restricted From
Admin	- Add/Edit/Delete therapists- Reset passwords- Monitor overall usage- Logout	Cannot view or add children
Therapist	- Add/Edit/Delete their own children- View milestones & strategies- Chat with AI- Edit child info to regenerate goals	Cannot add new therapists

UI FLOW OVERVIEW

1 Login Page (Common Entry)

Purpose: Unified login for both Admin & Therapists.

Design:

- Centered card layout
- App name/logo at top
- Fields:
 - Email / Username

- Password
- Button: **Login**
- Optional: “Forgot Password?”
- Error state: “Invalid credentials” (soft red text)

Flow:

- If credentials = Admin → redirect to **Admin Dashboard**
- If credentials = Therapist → redirect to **Therapist Dashboard**

2 Admin Dashboard

Purpose: Manage all therapists in the system.

Sidebar:

- 🏠 Dashboard
- ➕ Add Therapist
- 👤 Manage Therapists
- 🔒 Logout (bottom)

Main Panel Layout:

- **Header:** “Therapist Management”
- **Search bar** (to find a therapist quickly)
- **Therapist Table:**

Name	Email	Assigned Clients	Date Added	Actions
Sarah Lewis	sarah@clinic.com	3	Feb 2, 2025	✎ Edit • 🗑 Delete

- **Add Therapist Button:** Opens modal form.

Add Therapist Modal:

Fields:

- Full Name
- Email Address
- Create Password (auto-generate or manual)
- Confirm Password
- Notes (optional)

Buttons:

- [Save] [Cancel]

After save → “Therapist added successfully” toast.

Edit/Delete Actions:

-  Edit → inline form modal.
-  Delete → confirmation popup:

“Are you sure you want to remove this therapist?”
[Delete] [Cancel]

3 Therapist Dashboard

Purpose: Therapist’s personalized workspace to manage their clients (children).

Sidebar:

- 🏠 My Dashboard
- 👶 Add New Child
- 📜 Chat History
- 🔑 Logout

Main Panel:

a) Children Overview Table

Child Name	Age	Primary Concern	Last Updated	Actions
Emma	3 yrs	Language delay	2 days ago	👁 View • ✎ Edit • 🗑 Delete

Top Button: ➕ Add New Child

4 Add / Edit Child Form

Purpose: Therapist creates or edits client profile.

Layout: Clean modal or dedicated page with soft card fields.

Fields:

- Child Full Name
- Date of Birth (auto-calculates age)
- Gender
- Primary Concern / Area of Focus
- Parent/Guardian Name
- Notes / Observations

Buttons:

- [Add Child] or [Save Changes]

- [Cancel]

After “Add Child”:

- Redirect to **Child Profile Page**
 - Toast: “Child added successfully. Generating milestones and strategies...”
-

5 Child Profile Page (Personalized Workspace)

This is the **main action area** for therapists.

Header Bar:

- Child’s Name + Age
- [Edit Info] [Delete Child]
- Breadcrumb: “← Back to Dashboard”

Main Sections (stacked cards):

Milestones / Targets

- Auto-generated cards (editable)
 - “Follow one-step directions during play.”
 - “Label familiar items using 2-word phrases.”
- Button: [Regenerate Targets] → reruns AI based on edits

Strategies

- Evidence-based recommendations (editable)
 - “Model short phrases during routines.”
 - “Use gestures to support comprehension.”
- Button: [Regenerate Strategies]

AI Chat Assistant

- Floating chat icon (bottom-right corner)
- Opens chat panel or right-side drawer:
 - Shows therapist–AI conversation
 - Input box + send button
 - Context automatically tied to child’s details (age, concerns)
 - “View Previous Chats” button
 - Chats stored under that child’s profile

Edit & Update Flow:

- Therapist edits details → clicks Save
- System re-runs AI → refreshes milestones & strategies
- Notification:

“Goals and strategies updated for [Child Name]”

Chat History View

Each child has a saved thread of past interactions.

Chat History Panel:

Date	Summary	View Button
Feb 10, 2025	Discussed parent coaching	 View
Feb 3, 2025	New milestone review	 View

Click **View** → expands full chat thread with timestamps.

7 Delete Confirmation

Universal popup (for deleting child or therapist):

⚠️ “Are you sure you want to delete this record? This cannot be undone.”
[Delete] [Cancel]

8 Logout

- Sidebar button
 - Confirmation (optional)
 - Redirect → Login page
 - Toast: “You’ve logged out successfully.”
-

DESIGN STYLE GUIDE

Element	Design Intention
Colors	Clean whites, calming light blues/teals, warm accent (for buttons)
Typography	Rounded sans-serif (Poppins or Inter)
Buttons	Rounded corners, primary (solid color), secondary (outlined)
Layout	Card-based dashboard with sidebar navigation
Icons	Minimal line icons (Lucide or Material)
Animations	Smooth slide-in modals, fade confirmations
Accessibility	High contrast, large buttons, mobile/tablet friendly

Page Access Summary

Page	Admin	Therapist
Login	✓	✓
Dashboard	✓ (Therapist management)	✓ (Child management)
Add/Edit Therapist	✓	✗
Add/Edit Child	✗	✓
Child Profile + Chat	✗	✓
Chat History	✗	✓
Logout	✓	✓

✓ Key Personalization Principle

Each therapist's dashboard and children are *isolated* to their account — creating a self-contained workspace.

Each child has their own profile, chat, and dynamic goals — ensuring personalization per client.
